### Variability Studies in Seed Characteristics of *Ulmus villosa* Brandis collected from Different Sources in Kashmir Valley of J&K U.T

Mubariz Mehak, Aashfaq A. Mir, P.A Khan, Maqbool Rather, M.A Islam and Nageena Nazir  
Division of Forest Biology and Tree Improvement, Faculty of Forestry SKUAST-K

#### ABSTRACT

The aim of the study was to examine the variation in *Ulmus villosa* Brandis seed sources. Seeds were collected from trees in fifteen randomly selected sites across five districts in Kashmir. One tree of uniform age was selected from each site using the check tree method. The study found significant differences in seed morphology (size, weight, and the average number of filled and empty seeds) and seed germination parameters (germination percent, mean daily germination, peak value, germination energy, and germination value) among different seed sources. The results showed that seeds collected from Bijbehara-Anantnag had the highest mean values for length (12.91mm), width (4.72mm), weight (5.62g), and the average number of filled seeds (7.50). The highest number of empty seeds per cluster was observed in the Anchidora-Anantnag site (8.50). Seeds from Bijbehara-Anantnag also had the highest germination percentage (84.30%), mean daily germination (3.01), peak value (3.78), germination energy (56.64), and germination value (11.37). The study also found considerable variability in phenotypic and genotypic variance, their coefficient, and narrow sense heritability. The germination value exhibited the highest phenotypic and genotypic coefficient of variance (61.29 and 56.06, respectively), while the seed length had the lowest values for both (7.77 and 6.21, respectively). Narrow sense heritability was high for all the characters, with the maximum value for seed weight and the average number of filled seeds being 77.1%. Germination energy had the lowest heritability (61%). Genetic advance was highest in seed germination percentage (16.03), while mean daily germination had the highest values of genetic gain (65.83). Furthermore, a correlation study was conducted among the different traits studied during the investigation, revealing that most seed traits (length, width, weight) were positively correlated with corresponding germination traits (percentage, energy, value, peak, mean daily germination).

**Keywords:** *Ulmus villosa*, Seed source, Variability, Kashmir

#### Sun Exposure Effects on Human Skin

Anita Singh

Department of Home Science, Chandrakanti Ramawati Devi Arya Mahila PG College, Gorakhpur

#### ABSTRACT

As we all known that vitamin D is very essential for our body and its obtained from the sun rays, but in today's era of globalization as the climate is changing, it seems as the heat of sunlight is increasing day by day. Due to high exposure of sun light human beings are facing different types of skin related disease. The ultraviolet rays emanating from the sun are causing a lot of damage to the skin. The impact of climate change has been significant enough to endanger human health both directly and indirectly via heat stress, degraded air quality, rising sea levels, food and water security etc. too much exposure to ultraviolet rays can lead to various skin diseases. Ultraviolet rays can travel more deeply into the skin when UV rays enter skin cells, they upset delicate processes that effect the skin's growth and appearance.

Dignity of women is well known to all, how efficiently she tackle difficulties and does the situation in every aspect of life! The word 'Shakti' refers here about her awareness, digital knowledge, education, respectful life and strong presence in every field of life. Our changing lifestyle, technological development and financial dependency for better security and self-respect pulled her out to prove herself that she can perform well in every area, these new dimensions of life creates and rise some struggling situation in their life. Women's empowerment is an important goal in achieving sustainable development worldwide. We hope that this book inspires longitudinal and cross-cultural development of women's empowerment on the personal, relational, and societal dimension.

Our Government launch programme mission Shakti keeping in view that these all programme and awareness will increase their knowledge and awareness about security and protection laws which are working for women protection against dowry, molestation, physical or mental harassment, acid attacks, property right, cyber crime, and many other such as social abuses and crime. Malicious cyber activity threatens the women safety and our national and economic security.

This edited book will provide ever expanding multi-disciplinary information for women and society, we tried to cover all the areas related to their security, entrepreneurship, protection laws and information about the Acts, which made for their help. The learner in both the formal and non-formal system of education would benefit from this book.

### ENTREPRENEURSHIP DEVELOPMENT IN TRADITIONAL PAINTINGS ON CLOTHING

Dr. Anjna Singh

#### Abstract

Kalamkari Literally means, Kalam- Pen and Kari - work i.e. art work done using a pen. Vegetable dyes are used to colors the designs applied on Cloth. The art of painting using organic dyes on cloth. The art of painting using organic dyes on cloth was popularly in several parts of India. The attempt was targeted towards finding the possibility of applying Kalamkari designs on garments utilizing the satin ribbon. Total three kalamkari painting design were selected Internet, Books and Magazine for to decorating of garments through satin ribbon. These kalamkari designing was applied on the garments ( Saree , Anarkali - Suit , A line Dress ). And embellishment through only satin ribbon needle. The total cost of Saree was rs. 1800, Anarkali Suit was Rs. 2500, and A line Dress was Rs. 3000, and 20% labor cost. That after visual evaluation by 50 adolescent girls on the basis of color combination placement of design. Purchasing percentage overall appearance. In all three garment saree, Anarkali suit was most appreciated by the respondents. The highest score was obtained by Anarkali and the respondents were also willing to accept these design.

### TO BECOME AN ENTREPRENEUR IN THE FIELD OF HOME MANAGEMENT

Dr. Rita

"Waste Material Recycling: Tireless Efforts to make useful from materials"

The title of study is Waste material Recycling. Tireless effort to make useful article from waste material. This dissertation was done via survey method. Aim of dissertation was create a beautiful article from waste material using raw material newspaper, rope, thermocol, bangles, paint, glue etc. The articles were used to increase the beauty of the house. The waste materials were assessed for marketability and acceptability. The result indicate that (1) majority of the respondent know about article made by waste material (2) majority of the respondent so much like the beauty, texture, color combination, center of attraction and over all view of wall hanging, stool, rope basket Scenery and Bengal basket (3) majority of the respondents purchase a wall Hanging, stool, rope Basket, scenery and Bangle Basket at the cost of 100/-, 200/-, 200/-, 200/-and 100/- only respectively.
